

## New SARS-CoV-2 (Hygiene) Sample – Order Now!

LGC now offers proficiency testing (PT) samples for the detection of SARS-CoV-2 on surfaces. Samples are non-infectious swab samples for the detection of SARS-CoV-2 (COVID-19).

In the current coronavirus outbreak, companies and health authorities seek for solutions to monitor the presence of SARS-CoV-2 in their environments, in order to be able to implement immediate sanitation and other measures to protect the health and safety of employees and their environment. It is essential that laboratories ensure that their application of the surface methods and subsequent results are reliable and accurate using external quality assurance tools including PT.

Secure your testing - Order now as demand is high – first despatch is on 20<sup>th</sup> July 2020.

### SARS-CoV-2 (Hygiene)

#### Program Description

2 x 1.5 mL liquid non-infectious, fully-extractable specimen.  
Qualitative reporting for SARS-CoV-2 detection.

#### Program/ Analyte Information

SARS-CoV-2

#### Despatch Dates 2020

20<sup>th</sup> July, 30<sup>th</sup> November
